### DETAILED ACTION

1. This Office Action is in response to a phone call (June 8, 2010) from Mr. Daniel Rube to inform that a typo has been made to include non-elected claims 63-65 in the objected claims in the Final Rejection dated 05/24/2010. Thus, this Office Action is a **Supplemental Final Rejection**.

2. In view of the Amendment, the rejections of 31-34, 37, 42-46, 49, 61, and 67 under 35 U.S.C. 102 (b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Brinker et al. (US 6,270,846 B1) are withdrawn

### *Claim Analysis*

3. Summary of Claim 31:

An organic-inorganic hybrid material comprising two phases:	
	<b>a first, mineral phase</b> comprising a structured mesoporous network with open porosity; wherein the structured mesoporous network exhibits an <u>organized structure with a repeating unit</u> ; and
	<b>a second, organic phase</b> comprising an organic polymer, said organic phase not participating in creating the structured mesoporous network of the mineral phase and being essentially not present inside the pores of the structured mesoporous structure of the mineral phase

### *Claim Rejections*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

***Claim Rejections - 35 USC § 102***

6. Claims 31, 35-36, 38-43, 46-48, 62, and 67 are rejected under 35 U.S.C. 102(b) as being anticipated by Bardot et al. (US 5,342,521).

The rejection is adequately set forth in the paragraph 9 of the previous Office Action dated 08/06/2009 and is incorporated herein by reference.

***Claim Rejections - 35 USC § 102/103***

7. Claim 66 is rejected under 35 U.S.C. 103(a) as being unpatentable over

Bardot et al. (US 5,342,521) in view of Wu (US 6,465,052).

The rejection is adequately set forth in the paragraph 11 of the previous Office Action dated 08/06/2009 and is incorporated herein by reference.

### ***Response to Arguments***

8. Applicant's arguments filed 02/04/2010 have been fully considered but they are not persuasive.

Applicants: "Given Bardot's silence regarding the structure of the mesoporous layer and the understanding of one of ordinary skill in the art with regard to mesoporous materials, Applicants submit that the invention of claim 31 is neither anticipated by nor rendered obvious by Bardot. As such, Applicants respectfully request reconsideration and withdrawal of the instant rejection."

Bardot's silent does not necessarily imply that the mesoporous material disclosed by Bardot does not have structured mesoporous network. In view of the statement disclosed in page 5 of the present specification: "Structured mesoporous materials .....exhibit an organized spatial layout of mesopores. **This spatial periodicity of the pores is characterized by the appearance of at least one low-angle peak in an X-ray scattering diagram**; this peak is associated with a repeat distance which is generally between 2 and 50 nm. **The mesostructure is verified by transmission electron microscopy**" (page 5 of the Specification)", there are experimental methods to distinguish "structured mesoporous network" from common "mesoporous network".

Since the rejections of 31-34, 37, 42-46, 49, 61, and 67 under 35 U.S.C. 102 (b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Brinker et al. (US 6,270,846 B1) are withdrawn, **claims 32-34, 37, 44, 61, and 66 are objected** to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
